## Professional Summary

Results-driven Software QA Engineer with 1.10+ years of experience in manual testing, functional testing, and API testing in the banking and fintech domain. Specialized in end-to-end validation of UPI, IMPS, NEFT, RTGS, and IFT payment workflows for applications serving 10+ lakh users. Proficient in Postman, Azure DevOps, Cypress, and Finacle Core Banking. Reduced production defects by 30%; recognized with the Delivery Excellence Award for 100% QA process adherence. Experienced in Agile and Scrum methodologies.

## Technical Skills

**Testing:** Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, End-to-End Testing, UAT, API Testing, Automation Testing

**Tools & Platforms:** Cypress, Mocha, Chai, Azure DevOps, Postman, Finacle Core Banking, Git, GitHub, MS Excel

**Technologies:** JavaScript, HTML5, CSS3, React.js, Node.js, Express.js, MongoDB, SQL

**Domain:** Banking Systems, Digital Payments (UPI, NEFT, RTGS, IMPS, IFT), Core Banking, Fintech

**Methodologies:** SDLC, STLC, Agile, Scrum, Test Case Design, Defect Life Cycle, Defect Tracking, Root Cause Analysis

## Professional Experience

### QualityKiosk Technologies Pvt. Ltd.

Software QA Engineer | Client: Kotak Mahindra Bank

Mumbai, India

Sept 2024 – Present

- Executed functional and regression testing for a mobile banking application with 10+ lakh active users, ensuring zero critical post-release failures across all tested modules.
- Validated end-to-end UPI, NEFT, IMPS, and RTGS payment workflows across multiple modules, identifying critical defects and reducing transaction failure rates.
- Designed and executed test cases for each release cycle, improving defect detection efficiency and ensuring software quality.
- Identified, logged, and tracked critical defects using Azure DevOps, improving defect resolution and reducing post-release production issues.
- Performed API testing using Postman across RESTful API endpoints, validating request and response payloads, HTTP status codes, error handling, and data integrity for payment and account management services.
- Performed account-level validation in Finacle Core Banking test environments during each release cycle.
- Collaborated with 8+ developers to resolve defects, improving average bug resolution time by 20% through structured defect triage and clear defect documentation.

## Projects

### E-Commerce Web App – Cypress Automation Suite | Cypress, JavaScript, Mocha, Chai

2026

- Built an end-to-end Cypress automation test suite for a web-based e-commerce application, covering user authentication, product search, cart management, and checkout workflows.
- Authored 40+ automated test cases for smoke and regression testing, reducing manual test execution time by 60% and enabling faster release validation cycles.
- Integrated Mocha and Chai for structured test reporting, improving test traceability and defect identification across modules.

### Spotify Clone | React.js, Node.js, MongoDB, Express.js, Redux, JWT, Axios

2024

- Architected full-stack application with React.js and Redux for real-time state management, supporting 500+ concurrent sessions in local load testing.
- Engineered RESTful APIs with Node.js and Express.js achieving <200ms average response time across 15+ endpoints; secured with JWT authentication.
- Designed MongoDB schemas for users, playlists, and tracks supporting 10,000+ entities with indexed querying for sub-100ms reads.

## Education

### Lakshmi Narain College of Technology

Bachelor of Technology | CGPA: 8.19

Bhopal, India

2019 – 2023

## Certifications

Cypress Automation Testing Framework – Zero To Hero (Coursera) · Introduction to Software Engineering (Coursera) · Node.js Masterclass – Express, MongoDB, OpenAI (Udemy) · React.js – The Complete Course for Beginners (Udemy) · Introduction to SQL (Simplilearn) · Learn JavaScript for Beginners (Udemy)
